

MATERIAL SAFETY DATA SHEET

SSS GLUE (Super STYRO Stick)

SSS Glue (Super Styro Stick) is a Polyurethane based material and it does not cause any harm to health. The following precautions must be followed as below:

- (1) Must be kept in 20° C room temperature for a minimum of 3 hours before use.
- (2) On pouring the materials in another smaller container for use, this container should be completely dry from water and not wet with humidity.
- (3) As it is reactive with humidity, so SSS container should be kept closed when not in use.
- (4) Use gloves while using SSS, SSS is not good to get in touch with hands or any part of the body since it has a strong adhesive features.

TECHNICAL SPECIFICATIONS			
PROPERTIES	UNIT C		TEST METHOD (DIN)
Density	g / Cm ³	1.100-1.300	53420
Specific Gravity	g / Cm ³	1.100	
Tensile Strength	N / nm ²	33.0-37.0	53504
Thermal Coefficient	-5	15-16	
Of liner expansion	1 K.10		
Color		Dark Brown	
Viscosity		6 Poise	
Specific Gravity	g / Cm ³	1.100	
Drying Time	Hrs	4 - 8	
Coverage		4-6 Sq. mtr / kg	
VOC (Volatile Organic Compound Test)		1.44gm/Ltr	ISS PA Hand Book

First Aid Treatment if any case of contact to sensitive areas:

Eye contact:

If has entered the eyes, flush immediately with direct water and obtain immediate medical attention.

Skin contact:

Wash the skin immediately with copious amounts of water and soap (if available). Obtain immediate medical attention if there is skin irritation.

Personal Hygiene:

This is important whenever using chemicals:

- Wash all splashes of SSS glue off your skin at once with soap and water. Try to avoid using solvents.
- Do not keep food or eat or drink in the work area
- Do not smoke in the work area, or if you have SSS glue on your hands.
